Notable Features...

Affordable Price Range
Easy to Install

WHICH CAMERA SYSTEM DO I NEED?

Whether you're looking for a ruggedized camera system that can withstand anything and everything you can throw at it, or a light duty back-up camera for your trailer, we have the equipment to fit your needs.

AgCam

The AgCam camera system is the most durable, dependable and user friendly camera system available to the agricultural market today, and it's made in Americas heartland. This Analog High Definition camera system provides incredible picture quality. AHD cameras have the versatility to be programmed from the factory, with the ability to adjust video output type (AHD or Analog), mirroring and video system (NTSC or PAL).

EnduraCam

The EnduraCam system utilizes the rugged AgCam AHD framework and punches it up that extra step. Additional internal reinforcement allows the EnduraCam camera to withstand even more vibration and abuse than the AgCam. Perfect for military applications, construction, logging or other extreme conditions.

OverView

The OverView rear view camera monitoring system is Dakota Micro's entry level camera system. OverView equipment offers quality construction, versatility, and an impressive list of features with an affordable price tag.

Dakota Micro, Inc. also offers a wide variety of adaptor cables available for all camera lines, allowing you to hook up to nearly any third party monitor available.

Customer Service is our Focus

In addition to our quality products, Dakota Micro also offers superior customer service. Whether it's helping you find the products you need or a dealer in your area, were here to help.

WHY DO PEOPLE LOVE DAKOTA MICRO, INC. CAMERAS?

The AgCam and EnduraCam systems have been designed and manufactured to give you a product that will last for years, even in the harshest environments. With cameras that are 100% waterproof, 10G shock and vibration certified and feature an impressive 3 year warranty, there is no better camera for use in even the toughest situations.

With most electronics being imported from overseas, Dakota Micro, Inc. is proud to manufacture the AgCam and EnduraCam cameras in the USA.

AgCam® and ENDURACAM®

are now available in High Definition!

The advantages of AHD are many, and extend far beyond improved image quality and clarity. As simple to install and maintain as traditional analog video systems, AHD offers 4x the resolution of the most powerful analog cameras.

FEATURES

- 4X the resolution of the most powerful analog camera - True HD at 720P
- Cameras are now programmable from the factory:
 - Video type (AHD or Analog)
 - Video Output type - NTSC or PAL
 - Mirroring
- Increased ability to interpret shadowed areas, allowing for larger viewing area
- All the durability of the classic AgCam and EnduraCam cameras but now in High Definition
- Still made in the USA!
- 3 Year factory warranty on cameras
- Cameras and monitors are matched 16:9 aspect ratio so all images are true to life
- Effective IR Night Vision increased up to 75+ feet in complete darkness and resists back reflection
- Ability to produce High Definition images utilizing existing coaxial cables
- Zero latency (as opposed to digital)
- As simple to install and maintain as traditional analog video systems
