

Dakota Micro Achieves ISO 9001:2008 Certification

Dakota Micro, Inc. Awarded ISO Quality Certification for its North Dakota Manufacturing Facility

Cayuga, ND; October 17, 2011 – Dakota Micro, Inc., a leading provider of industrial camera technology, including rear view camera systems for agriculture, military, public works and construction, today announced that it has achieved ISO 9001:2008 certification. Dakota Micro has been awarded this designation by QMI-SAI Global for meeting the guidelines set out by the International Organization for Standardization.

This certification recognizes Dakota Micro's committed to meet and exceed their customers' expectations through understanding the environment of the customer, consistently delivering high quality products and services to their customers as well as continuously improving their products and processes and following ISO 9001:2008 requirements for their Quality Management System

"We've always been proud of our product quality and have built our reputation of providing our customers with superior, made in the America equipment. Achieving certification for ISO 9001 has been an exciting step for us as a company and we plan to utilize the tools provided to us by these quality standards to continuously improve our products, services, and our company as a whole" said Charissa Rubey, Director of Sales & Marketing at Dakota Micro, Inc.

This ISO certification supports Dakota Micro's corporate objectives, while reinforcing a culture of excellence. As Dakota Micro continues to expand in markets around the world, the ISO quality framework will assure customers that they will continue to receive the highest quality products and service from Dakota Micro, Inc.

ABOUT DAKOTA MICRO

Dakota Micro, Inc. is a privately held company located in SE North Dakota. DM is the exclusive manufacturer of the AgCam rear view camera system that is being partnered with OEM's such as Trimble, AGCO, TOPCON, AgLeader, Kinze and DICKEY-john to name a few. We are proud to have made a name for ourselves in the agricultural market, having been in the industry since 2002. With the success of cameras in the agricultural market, Dakota Micro has quickly and easily moved into the public works and military markets under the product line EnduraCam. Dakota Micro has cameras that are currently being utilized on the Case IH armorized tractors in theater in Iraq as well as various DOT's around the country on Plows, sweepers, Garbage trucks and more. Dakota Micro also offers a price point camera system under the product name OverView, allowing the company to provide mobile camera products for every customer and every need.
